My Story

I learned about Jesus through the loving ministry of my parents raising me up as a child in the way I should go, and I met Jesus personally at a young age. It's taken decades of God's refining work to bring me where I am today. But his work in my life is nowhere near complete, and he teaches me something new every day!

In 2008, God brought me to Cleveland Ohio and got me connected to The Rock Community Church. Since then, he has impressed on my heart a vision for revival and revitalization of the city - especially by reaching students and young adults for Christ!

Reaching Students and Young Adults

In 2009, God led me to begin a Life Group of young adults and students at The Rock Community Church. We started out very small, but we faithfully met in my apartment, broke bread, and worshiped God together. Soon, our vision for campus ministry developed, and we began to pray about reaching out to Cleveland State University.

God has blessed and grown our vision *immensely*, and today our group meets on campus at least once a week for worship, teaching, fellowship, discipleship, and accountability. By the grace of God, we plan to establish a large, healthy ministry at Cleveland State University with the goal of making sure that every young man and woman on campus has multiple opportunities to hear and receive the gospel!

My Role

As a campus missionary with Great Commission Ministries, and as the leader of this campus ministry for The Rock Community Church, it is my job to take responsibility before God for teaching and leading the group. I have been asked to lead through teaching, sharing the gospel, and spending time with students one-on-one.

I believe God has called me into this ripe mission field, and I am excited to reach campus for the gospel! With God, all things are possible!
